

## Junior Product Manager (m/w/d)

– full time –

You don't want to "just go to work" every morning? Then join our colorful, dynamic team that tackles the increasing demands of the biotech market every day, promotes creative ideas and works together as a team on one level - WE ARE PROGEN!

As **Junior Product Manager**, you will be responsible for the day-to-day management of our life science tools portfolio. You will report directly to the Head of Product Management.

### Your tasks at PROGEN:

- Research markets, determine customers' needs and identify opportunities for growth
- Provide input to product improvements & development
- Assist in the development of pricing strategies and production forecasts
- Draft and update product information, datasheets, user manuals, etc.
- Act as coordinator for cross-functional teams - R&D, QM/QC, Marketing, Sales, Scientific Support and Production
- Occasional travels required

### You add to our team:

- A Master or Bachelor degree in life sciences
- Experience in standard lab techniques with a focus on molecular, cell biological or biochemical analyses
- An open, communicative, networking personality
- An ability to manage multiple priorities with a problem-solving attitude
- A profound interest in and understanding of customer behavior
- A demonstrated ability to interpret market data and to offer insight and recommendations for business opportunities
- Solid computer & data analysis skills
- Fluent communication skills both written and spoken in English (level B2) and German (level C1)

### Sounds good so far?

Then send your application and CV via email ([personal-pm@progen.com](mailto:personal-pm@progen.com)) directly to Dr. Dana Holzinger and tell us your start date and salary expectations. **We are looking forward to your application!**

## About us

PROGEN was founded in 1983 by four scientists from Heidelberg, Germany, who joined forces to manufacture and supply high quality antibodies for biomedical research. Starting as a pioneer antibody manufacturer, PROGEN has become a globally operating biotech company and a reliable partner for academia, biotech and pharma.

We help scientists worldwide drive biopharmaceutical and diagnostic progress to provide high-quality and reliable treatments for patients. Our mission is to make new therapies safe and affordable and to improve existing research processes.

The PROGEN team consists of bioscientists and adeno-associated virus (AAV) experts who collaborate with specialists around the world. Our products are essentials for research in science and industry.

We are more than just a manufacturer of antibodies, AAV gene therapy tools, density gradient media, and phage display technologies: We strive to understand the needs of scientists to develop solutions to jointly address challenges in academic research, biotechnology and pharma.
