

Product datasheet

anti-Channelrhodopsin 2 mouse monoclonal, 15E2, supernatant

Short overview

Cat. No.	651180
Quantity	5 ml

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG2a
Clone	15E2
Immunogen	Purified recombinant Chr2-315
Formulation	Contains 0.09% sodium azide
Synonym	Chr2
Conjugate	Unconjugated
Purification	Hybridoma cell culture supernatant
Storage	Short term at 2-8°C; long term storage in aliquots at -20°C; avoid freeze/thaw cycles
Intended use	Research use only
Application	ELISA, ICC/IF, IHC, WB
Reactivity	Chlamydomonas

Applications

ELISA	1:10-1:500
Immunocytochemistry (ICC)	Assay dependent
Immunohistochemistry (IHC) - frozen	Assay dependent
Immunohistochemistry (IHC) - paraffin	No data available
Western Blot (WB)	1:100-1:200

Background

Channelrhodopsin 2 (Chr2) is a cation-permeable channel protein that enables cell depolarisation in response to blue light. The antibody specifically detects the C terminus of Chr2. The epitope is located intracellularly between amino acids 290 and 309 of Chr2.
