

Product datasheet

anti-Hantavirus Puumala mouse monoclonal, A1C5, Peroxidase Conjugate

Short overview

Cat. No.	A1C5-POD
Quantity	200 µl

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG1
Clone	A1C5
Immunogen	Recombinant Puumala nucleocapsid protein
Formulation	PBS with BSA and 0.001% thimerosal
Note	Centrifuge prior to opening
Conjugate	Peroxidase/HRP
Purification	Affinity chromatography
Storage	2-8°C
Intended use	Research use only
Application	ELISA
Reactivity	Puumala virus-infected cells

Applications

ELISA	1:50
--------------	------

Background

A1C5 reacts with an epitope present on the N-terminus (between aa 15 and 35) of the nucleocapsid protein (S segment) of hantavirus CG 18-20 strain (Puumala serotype) and also cross-reacts with SNV (Sin Nombre virus) rN protein (Schmidt et al. 2005).

Schmidt, J., Meisel, H., Hjelle, B., Krueger, D. H. & Ulrich, R. Development and evaluation of serological assays for detection of human hantavirus infections caused by Sin Nombre virus. J. Clin. Virol. Off. Publ. Pan Am. Soc. Clin. Virol. 33, 247-53 (2005).
