

Product datasheet

anti-Cyclin-Dependent Kinase 4 mouse monoclonal, DCS-156, liquid, purified, sample

Short overview

Cat. No.	690096S
Quantity	200 µl
Concentration	50 µg/ml (10 µg)

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG1
Clone	DCS-156
Immunogen	Human recombinant full-length cdk4 polypeptide
Formulation	PBS pH 7.4 with 0.09% sodium azide and 0.5% BSA
UniprotID	P11802 (Human),P30285 (Mouse),P35426 (Rat)
Synonym	Cyclin-dependent kinase 4, EC 2.7.11.22, Cell division protein kinase 4, PSK-J3, CDK4
Conjugate	Unconjugated
Purification	Affinity chromatography
Storage	Short term at 2-8°C; long term storage in aliquots at -20°C; avoid freeze/thaw cycles
Intended use	Research use only
Application	WB
Reactivity	Human, Mouse, Rat

Applications

Western Blot (WB)	1:50-1:500 (0.1-1 µg/ml)
--------------------------	--------------------------

Background

DCS-156 reacts specifically with cdk4 protein present predominantly in G1 phase of cell cycle; it does not cross-react with cyclins. In immunohistochemical application on frozen sections of head and neck carcinoma (oropharynx and hypopharynx carcinoma) and cervix DCS-156 shows distinct nuclear staining, especially in tumor areas of enhanced proliferation. Epitope recognized: aa 270-290.

Product images

Western blot analysis of human HeLa cell lysate with anti-Cyclin-Dependent Kinase 4 antibody. Western blot analysis was performed on either 5 µg or 10 µg of HeLa lysate. Cells were lysed in PBS by homogenization. The PVDF membrane was blocked with 5% dry milk in PBST for 1 h at RT. The primary antibody anti-Cyclin-Dependent Kinase 4 mouse monoclonal, DCS-156 (Cat. No. 690096) was diluted in blocking buffer (antibody concentration 0.5 µg/ml) and incubated for 1 h at RT. The secondary antibody goat anti-mouse IgG polyclonal, HRP conjugate was also diluted in blocking buffer (antibody concentration 0.2 µg/ml) and incubated for 1 h at RT. The bands were visualized by chemiluminescent detection using Pierce™ ECL Western Blotting Substrate.
