

Product datasheet

anti-CD48 mouse monoclonal, 156-4H9, purified

Short overview

Cat. No.	691590
Quantity	1 ml (100 µg/ml)
Concentration	100 µg/ml

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG1 kappa
Clone	156-4H9
Immunogen	Stimulated human PBL
Formulation	PBS with 0.02% sodium azide
UniprotID	P09326 (Human)
Synomym	CD48 antigen, B-lymphocyte activation marker BLAST-1, BCM1 surface antigen, Leukocyte
	antigen MEM-102, SLAM family member 2, SLAMF2, Signaling lymphocytic activation molecule 2,
	TCT.1, CD antigen CD48, CD48, BCM1, BLAST1
Conjugate	Unconjugated
Purification	Affinity chromatography
Storage	2-8°C
Intended use	Research use only
Application	FACS, ICC/IF, IHC
Reactivity	Human

Applications

Flow Cytometry (FACS)
Immunocytochemistry (ICC)
Immunohistochemistry (IHC) - frozen

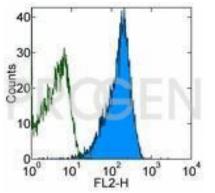

0.5-1.0 μg/million cells in 0.1 ml 1:100-1:200 (0.5-1.0 μg/ml) 1:50-1:100 (1-2 μg/ml)

Background

CD48 is a 45 kDa glycosyl phophatidyl-inositol (GPI)-anchored cell surface protein, highly expressed on lymphocytes and monocytes and weakly on granulocytes. Platelets, fibroblasts, epithelium and endothelium are negative. CD48 has a cellular function in adhesion via its receptor CD2 and a role in gamma/delta T-cell recognition as an accessory molecule and forms one of the markers for detecting the GPI anchoring defect in patients with paroxysmal nocturnal hemoglobinuria (PNH). 156-4H9 was typed in Kobe, Japan at the VIth International Workshop on human leucocyte differentiation antigens.

Positive control: Daudi, JY, Raji, Jurkat, and human lymphocytes. Human lymph node and tonsil.
