

Product datasheet

anti-Plakophilin 1 mouse monoclonal, PP1-2D6, supernatant

Short overview

Cat. No.	65161
Quantity	5 ml

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG1
Clone	PP1-2D6
Immunogen	Plakophilin 1 ("band 6 polypeptide" of bovine muzzle epidermis)
Formulation	Contains 0.09% sodium azide
UniproID	Q28161 (Bovine), E1C1N1 (Chicken), Q13835 (Human), I3LGN8 (Pig), H0VCU0 (Guinea pig)
Synonym	Plakophilin-1, Band 6 protein, B6P, PKP1
Conjugate	Unconjugated
Purification	Hybridoma cell culture supernatant
Storage	Short term at 2-8°C; long term storage in aliquots at -20°C; avoid freeze/thaw cycles
Intended use	Research use only
Application	ELISA, IHC, WB
Reactivity	Bovine, Chicken, Human, Pig

Applications

ELISA	Assay dependent
Immunohistochemistry (IHC) - frozen	Ready-to-use (preincubation (directly after fixation) with 0.05-0.2% Triton X-100, for 5-10 min recommended; for delicate tissues like liver and gastrointestinal material preincubation with saponin is preferred)
Western Blot (WB)	Assay dependent

Background

Antibody recognizes plakophilin 1 in diverse stratified epithelia, in complex epithelia (e.g. urothelium of the bladder and tracheal epithelium) and in glandular duct epithelia; squamous cell carcinoma are positive, whereas all adenocarcinoma tested so far are negative. Polypeptide reacting: Plakophilin 1: calculated mol. wt. 80,496 (human) and 80,180 (bovine). Reactivity on human cultured cell lines: HaCaT, A-431.
